

ASSIGNMENT 1: STATEMENT FORMATION

NAME: SAWALE MANAS

SUB: EDS

DIV : H

ROLL NO: 854

PRN: 202201060037

PROBLEM STATEMENT:

Find the statistical Analysis on Employee Payroll dataset (**Refer Data Set 5**)

- a. Find the employee who is having maximum salary
- b. Find the employee who's job title is Chief Human Resources
- c. Find the experience of all the employee
- d. Find the total basic pays of employee in Fiscal Quarter 4
- e. Clean the dataset if record is empty with 0 values or delete incomplete data row
- f. Find the employee summation of all employee salary those who are from working in "PROVIDENT HOSPITAL"
- g. Find frequency count of all job titles

CODE:

```
import pandas as pd
```

```
df = pd.read_csv('Dataset5.csv')
```

```
print(df)
```

```
max_sal=df.groupby('First Name')['Base Pay'].idxmax()
```

```
print('1)employee with max salary:\n',max_sal)
```

```
chief_hr= df.groupby('Job Title')['First Name'].get_group(('Chief of Human Resources'))
```

```
print('2)employee with job title Chief of Human Resources :\n',chief_hr)
```

```

current_year = 2023 # Replace with the current year
df['Experience'] = current_year - df['Original Hire Date']
print('3)experience of the employees:\n',df)

fs_qrt4_tp = df.groupby('Fiscal Quarter')['Base Pay'].get_group(4).sum()
print('4)total basic pay of the fisal year quarter 4:\n',fs_qrt4_tp)

df.fillna(0, inplace=True)
df.dropna(inplace=True)

print('5)after:Cleaning the dataset if record is empty with 0 values or deleting
incomplete data row\n',df)

provident_hospital_sum = df.groupby('Office Name')['Base
Pay'].get_group('PROVIDENT HOSPITAL').sum()
print('6)total payment of provident haspital:\n',provident_hospital_sum)

job_counts = df['Job Title'].value_counts()
print('7)job counts:\n',job_counts)

```

Output:

	Fiscal Year	Fiscal Quarter	...	Position ID	Original Hire Date
0	2016	1	...	9510200	1905
1	2016	2	...	9510200	2005
